2005 Corporate Overview

- We help customers increase operational efficiency, reduce risk and liability exposure, and improve product quality and customer experience through our technology management services.
 - Operational Assessments (technology, data management, business processes, sourcing) to help evaluate business/technology needs, risks, and current positioning. These assessments help clients prioritize projects, determine ROI, and manage resources.
 - Microsoft Business Solutions Partner specializing in productivity products such as Customer Relationship Management, Small Business Server 2003, Small Business Financials, and Retail Management System. By specializing in these solutions, we are able to provide product expertise to your specific business requirements.
 - Value Added Reseller of Dell[®], HP[®], Iomega[®], Microsoft[®], Symantec[®]/Veritas[®], and WatchGuard[®] products. These partnerships enable us to provide competitive pricing on brand name products, services, and solutions.

*"Your business should serve your customers,
your technology should serve your business." – Steven Lindner*
